Neutral Grounding Resistor:

Qty: _____

System Voltage (Line to Line): _____
Resistor Voltage (Line to Neutral): _____
Rated Fault Current (i.e. 5A, 400A): _____
Time on or Duty (i.e. 10s, Continuous): _____
Enclosure (i.e. Indoor, Outdoor, Other): _____
CT ratio if a CT is required (i.e. 400/5) _____
Neutral Bushing Required? (Y/N): _____
Ground Bushing Required? (Y/N): _____
Enclosure material (i.e. Painted steel): _____
Paint Color (i.e. ANSI 61 Gray): _____
Other: _____

Dynamic Braking Resistor:

Qty: _____

Drive Input Voltage: _____
Drive HP or Wattage: _____
Braking Torque (i.e. 100%, 150%): _____
Duty Cycle (On time / Off time): _____
Maximum Braking Current (Or Minimum Resistance): _____
Regeneration Type (Deceleration braking or Overhauling load): _____
If Thermal Switch required specify Normally Open or Closed: _____
Other: _____

Motor Control Resistor:

Qty: _____

Type (Wound Rotor, Squirrel Cage, Y-Delta, DC Series Wound): _____
Control Manufacturer: _____
Horse Power or Wattage: _____
Rotor Voltage: _____
Rotor Current: _____
Number of Speeds: _____
Application or NEMA Class: _____
Motion (Hoist or Travel): _____
Other: _____

Notes: _____
